EDUCATION

Colegio de Muntinlupa

2021 – 2025

Bachelor of Science in Computer Engineering, *cum laude*

- **Related Coursework:** Object-Oriented Programming, Data Structures and Algorithm, Database Management Systems, Artificial Intelligence with Data Analytics, Operating Systems

EXPERIENCE

SBT Holdings Inc.

June – August 2024

IT Intern

- Worked in a professional IT environment developing web applications using Laravel (PHP), MySQL, HTML, Tailwind CSS, and JavaScript.
- Assisted IT operations including network setup, hardware maintenance, and troubleshooting, broadening technical exposure beyond software development.

PROJECTS

AsteraCare: AI-Based Smart Flower Preservation System

2025

Mobile App Developer

- Built a native Android app (Kotlin/ XML) serving as the central hub for system automation, real-time monitoring, and manual hardware control.
- Integrated YOLOv8 AI model for camera-based flower classification and connected the app to an ESP32 microcontroller via Bluetooth SPP, enabling automated environmental adjustments to extend flower vase life.
- Designed an intuitive UI/UX for real-time sensor data monitoring, hardware control, and notification alerts.
- GitHub: github.com/ysawwwww/AsteraCareApp

Obelisk Order Inventory System

2024

Full-Stack Developer (Backend-focused)

OJT at SBT Holdings Inc.

- Developed a Laravel-based warehouse inventory management system following MVC architecture.
- Implemented Role-Based Access Control (RBAC) and full CRUD operations to streamline inventory tracking.

SKILLS

- **Programming Languages:** Python, HTML/CSS, JavaScript, SQL (MySQL), Kotlin, PHP, C/C++, Java
- **Frameworks:** Laravel, Tailwind CSS
- **Design & Tools:** Git/GitHub, Figma, Canva, TinkerCAD, Proteus 8, MATLAB

CERTIFICATES

- Civil Service Professional Eligibility (P.D. 907 – Honor Graduate Eligibility)
- HCIA-AI V3.5 Course – Huawei
- MATLAB Fundamentals – MathWorks
